

Oil cabinets

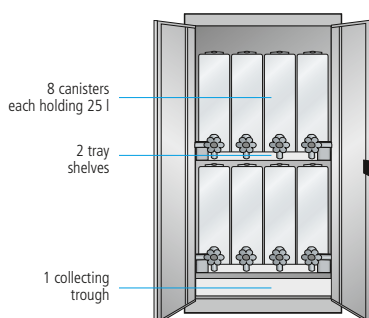

The tray shelves can be fitted and adjusted individually. The tray shelf has a handle on the left and right and a central stop bar. It is only 451 mm deep and there is therefore still space at the front for the canister tap. The base pan of the oil cabinet is welded tightly in accordance with the Water Resources Act § 19/StawaR (with test certificate, capacity of 40 litres).

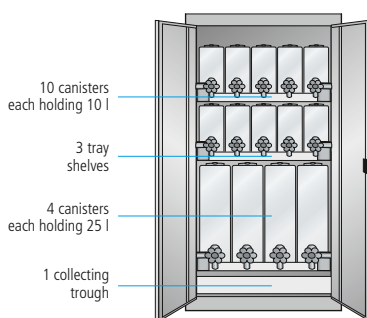

Height **1450** × width **717** × depth **753** mm

2 tray shelves incl. 8 canisters with brass taps

Specification	Art. no.
with 8 canisters	65.687.+++

3 tray shelves incl. 14 canisters with brass taps

Specification	Art. no.
with 14 canisters	65.688.+++

Tip

Liquids that are used for day-to-day routine operations are stored safely in the oil cabinets. The canisters are stored in the pull-out shelves. Drops of liquid are caught in a collecting trough. On the whole, the oil cabinets offer a secure and sturdy storage space for chemicals.

Please adhere to the legal provisions and regulations!

The canisters must only be filled with liquids free of acids and lyes, oils and greases with a flash point of over 55 degrees Celsius. The maximum ambient temperature is 40 degrees Celsius. Please give us a call regarding specific applications and for further information.
